

Department of Conservation and Recreation
Meaningful Watershed Educational Experiences (MWEE Grant)
York County School Division

Through partnership with the Old Dominion University Center for Educational Partnerships, we were able to provide professional development and training to 15 instructional staff which included MWEE lesson creation for each grade level, K-5. These lessons include all related instructional resources as well as teacher-facing instructional videos for each lesson. 613 students received MWEE focused field experiences with community partners which included: Virginia Institute of Marine Science, Virginia Living Museum, Virginia Aquarium, and Hide Away Farm.
